PROJECTS

E-COMMERCE HOME PAGE REDESIGN (FIGMA UI/UX)

Design Project | 2025

- Design & Architecture: Designed a comprehensive visual and functional redesign of an e-commerce home page, utilizing Figma Auto Layout and Variants to build a responsive, scalable component library.
- Prototyping: Developed a high-fidelity, interactive prototype to test critical user journeys, focusing on improving navigation and product discovery

PDF CHAT BOT

Python | 2024-2025

- Description: Developed an AI-powered system that allows users to interact with PDF documents through a conversational interface.
- Functionality: Extracts text using Natural Language Processing (NLP) to perform document summarization, information retrieval, and answer queries based on content.
- Technology: Built using Python libraries for efficient text extraction and conversation management.

RED PROUD (Blood & Donor Management System)

Web Development | 2022-2023

- Description: Created a web-based Blood & Donor Management System connecting donors with recipients to ensure fast and reliable access to blood donations.
- Features: Enabled users to register as donors, search for nearby available blood, request blood, and track donation history.
- Impact: Aims to bridge the gap between donors and patients using modern web technologies.
